Art Unit: 1653

This Office Action is in response to the outcome on Interference #103,933, issued January 4, 2002.

Claims 226 and 227 are currently pending. Claims 226 and 227 were favorably judged in Interference #103933 and are therefore allowable. However, upon perusal of pending applications, a provisional obviousness-type double patenting rejection is being made.

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thornton*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 226 and 227 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 13-18 of copending Application No. 08/311,665. Although the conflicting claims are not identical, they are not patentably distinct from each other because both sets of claims are drawn to vectors comprising DNA encoding the cystic fibrosis conductance regulator protein.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.
